Projects

Smart Evaluator - <https://github.com/Channakeshava96/smartevaluator>

- Built a web app for automated script evaluation using Cloud Vision API for handwritten text extraction.
- Applied SBERT model to compare student answers with rubrics for accurate scoring.
- Implemented backend with Node.js and Python for seamless integration of ML components.

Technologies: Node.js, Python, Google Cloud Vision API, Sentence-BERT (SBERT), REST APIs

Retrieval-Augmented Generation (RAG) System

https://drive.google.com/file/d/1N3uQ0nxnsi0m6yL_2E_WekdgyQBiaBHu/view?usp=sharing

- Built a RAG pipeline to enable knowledge-grounded responses from large language models (LLMs).
- Integrated local files and Google Drive data into a corpus with chunking and embeddings.
- Connected the pipeline with Gemini models for accurate, context-aware answers.

Technologies: Python, Retrieval-Augmented Generation (RAG), Embeddings, Vector Search, Gemini LLMs
